Direct Transfer to Science 10-18-61

Author Index

Volume 15

	Page		Page
Blum, Harold F.	211	Meredith, Howard V.	39
Bonham, Kelshaw	155	Moore, J. Percy	211
Chang, M. C.	213	Morgan, Joseph F.	11
Cohen, Isadore Roy	141	Morton, Helen J.	11
Hammett, F. S.	23, 125, 189, 201, 225	Oakberg, Eugene	57, 79
Iske, Barbara	147, 267	Palumbo, Ralph F.	155
Loefer, John B.	213	Parker, Raymond C.	11
MacFarlane, Eileen W. E.	241	Quiring, Daniel P.	101, 121
Matney, Thomas S.	213	Rahn, Otto	141, 147, 267
McCashland, B. W.	1	Zemgalis, Rasma	267

Subject Index

	Page
Acid formation	279
by Lactobacillus in riboflavin-free medium	279
in milk	271
Acid tolerance	
increase of	276
Adrenal gland	
comparative anatomy of	121
Adrenals, chick	57
Ageing of Bacteria	147
effect of riboflavin on	147
Alcohol produced by baker's yeast	270
Alcohol tolerance of yeasts	282
Algae	155
Allantoic fluid, sugar content of	218
Allium root tip cells as indicators of mercurial poisons	241
Amniotic fluid, sugar content of	218
Analysis of meristems	253
effect of short and long treatments	254
Anthropometric study of white boys	54
Apo-enzymes of cells, protection against metabolic products	287
Ascorbic acid	285
B-Vitamins	268
Bacteria, multiplication of	147
lactic acid production by	147
Bacterial cells, ageing of	141
Bacterial cultures, influence of riboflavin on	141
Birds	123
ratio of adrenal gland to body weight	123
ratio of thyroid gland to body weight	123
Blood of cattle, sugar content of	218
Book review	
Time's Arrow and Evolution	211
Bovine fetal fluids	213
sugar content of	216
Boys, anthropological expression of	39
abdomen girth	43
arm girth	43
average size	46
body form	50, 51

Page

body size 45
body weight 43
change in variability with age 46
chest girth 43
comparative size 46
correlation of size and form 53
hip width 42
leg girth 43
mean stature and weight 47, 48, 49
measurement of 41
shoulder width 42
size and form 39
upper limb length 42
variability in body size 46
variability values 45
Carbon dioxide produced by baker's yeast 270
Catabolism in Obelia colonies 225
Cattle, fetal fluids during gestation 213
Cell activity, inhibition of 11
Cell specialization 189
Chick embryo mesenchyme tissues 14
Chickens
adrenal, histology of 57
body and organ weights 63, 66, 67
correlations of organ weights 68, 69, 70
inter-organ correlations 57
organ weights 57
pancreas 71
pituitary and adrenal weights 57, 59, 60
sex differences 72
spleen 71
thymus, growth of 58
Chromatin bridges 249
Chromatin extrusion 250
Chromosome abnormalities 251
Chromosome fragments 249
Chromosomes, eroded 249
Cobalt, effect on animal cells 11
Comparative anatomy of the endocrine system 121
Correlations
between rate and temperature 126, 193
of fetal age with length of fetus 214
of lymphoid tissues with weights of organs 79
of percentage of mortality with lymphoid tissue of liver and pancreas . 90, 91
of lymphoid and eosinophile tissues with organ weights 88, 89
Crustacea 155
Cultures, roller tube 14
Cultures of spindle cells 12
Cytological response of *Allium* to mercurial poisons 242
correlation with concentration 246
at various intervals after exposure 248
during continuous exposure 249
during recovery 250
abnormalities after treatment 251
Differentiation 189
in *Obelia* colony 200
trends of rate on season 200

Page

of gonangia 194
variability computations 196
Effect of lactic acid on *Lactobacillus casei* 274
Effect of riboflavin on reproduction of *Lactobacillus casei* 273
Effects of water source on toxicity of mercurial poisons 241
Endocrine system
comparative anatomy 121
Enzyme systems, inactivation by organic mercurials 261
Eosinophile tissue in liver of white leghorn chickens 85
Eroded chromosomes 249
Fermentation 269
end point of 270
Fermentation rates, in bacteria 277
Fibroblast cultures 12, 16
effect of synthetic mixtures 16
effect of amino acid 16
effect of l-histidine 17, 18
Genetic constitution, influence on growth of lymphoid tissue 79
Genetic differences in leghorn chickens 57
Gestation
sugar concentration during 213
Glucose utilization by bacteria 279
Gonangia, differentiation variability 199
Gonangia, organization 203
correlation between rate and temperature change 205
Growth, initiation of 23
and temperature 31
Growth, quantitative 189
Growth, rate decreases in 26
Growth factors in bacteria 285
Growth of *Lactobacillus casei*
with riboflavin 275
without riboflavin 275
Growth of *Obelia*
endogenous factors 125
gonangial 192
Growth of *Obelia* hydranths 125, 191
Growth rate change, timing of 132
Growth rates, in bacteria 277
Growth of yeasts with and without thiamine 284
Hexose in fetal fluids 217
Histology of chicken adrenal 57, 63
Hydranth differentiation variability 199
Hydranth organization 202
correlation between rate and temperature change 204
Hydranths, differentiation of 193
Influence of solvent on cytological reactions 252
Inhibition of growth of fibroblasts 19
Initiation of growth on season 25
Initiation of growth, variability in expression of 33
Injury to *Obelia* colonies 225
Invertebrates, effects of X-rays on 186
l-Histidine, protective action of 11
Lactic acid production by muscle cells 286
Lactic acid production by *Lactobacillus casei* 269

Page

Lactobacillus casei 141, 268
effect of lactic acid on 274
effect of riboflavin on 273
Lactobacillus fermentum 277
Liver, chicken 79
Lymphoid areas and total lymphoid tissue in the liver of white leghorn chickens . 83
Lymphoid tissues of liver 82
Lymphomatosis in chicks 81
Maintenance of *Obelia* colonies 225
Maternal blood, sugar content of 216
Mercurial poisons 241
Metabolic rate in rats 9
Metabolism 1
Mice, North American 101
body weights 102, 103
organ weights 104-119
Microtis drummondi 101
Microtis pennsylvanicus 101
Mitotic concentration and influence of solvent 255
Mortality rates due to X-rays 162
Multiplication of animal cells in tissue culture 11
effect of cobalt on 11
protective action of l-Histidine on 11
Micronuclei 250
Non-specific cytological reactions to mercurial poisons 259
Nucleolar changes in mercurial poisoning 258
Nucleoli 250
Nutrition of animal cells in tissue culture 11
Obelia 27
colony 133
ageing of 238
injury to 239
maturation of 133
effect of temperature on 133
endogenous direction 135, 136
rate of catabolism in 238
season change in rate of growth 189
season change in temperature 238
gonangia 28
growth of 140
effect of temperature on 197
in culture 23, 125, 201, 225
quantitative 23
hydranths 27
activity expression and temperature 229-230
activity on season 226
catabolism 232
comparison of rate temperature effect and variability 197
growth of 140
injury to 236
non-growth activities 234-235
regression 231
stolon, differentiation variability 199
Organ weights of chickens 57
Organization during growth of *Obelia* 201

Page

Organization in *Obelia* colonies during culture 209
hydranth 209
gonangial 209
trends of rate on season 209
Organization variability 208
computation of 207
Oxygen consumption
rate of 9
during nursing and weaning 1
in rats 1, 4
effect of diet on 6
metabolism changes in rats 1
Pancreas, chicken 79
Primary cell types in livers of chickens 82
Primates
ratio of adrenal gland to body weight 124
ratio of thyroid gland to body weight 124
Proliferation and temperature 138
variability of 138
Proliferation of gonangia 129
effect of season on 128
Proliferation of *Obelia* hydranths 126
effect of season on 127
Proliferation of *Obelia*, variability in expression of 131
Quantitative growth
in *Obelia* colonies 23, 125, 189
in culture 201, 225
season changes in rates of basic activity 125, 201
Rate changes on season 189
Rate increase as season advances 136
Rate-temperature correlations during growth of *Obelia* colonies 136
during time of rise 136
during time of decline 136
rate decline 137
Ratio of cell increase 272
Rats 1
Reactions of dividing cells to mercurial poisons 256
Reducing sugar in bovine fetal fluid 213
Regression in *Obelia* colonies 225
Reptiles 122
ratio of adrenal gland to body weight 122
ratio of thyroid gland to body weight 122
Resorption of riboflavin by bacterial cultures 141
Respiratory quotient in rats 6
Riboflavin 147, 268, 271
accumulation 280
assay 273
destruction in bacterial cultures 151
incorporation into bacterial cells 153
recovery of from bacterial cells 143
effect on growing cultures 144
acid formation following 145
Ring chromosomes 250
Rodents 123
ratio of adrenal gland to body weight 123
ratio of thyroid gland to body weight 123
Saccharomyces cerevisiae 277

Page

Season changes in rates of basic activities 23, 125, 189, 225
Season variability 208
Snails 155
Spindle abnormalities 251
Strain cultures of fibroblasts 12
Streptoccocus glycerinaceus 271
Succinoxidase system of cells, poisoning of 264
Synthetic media for tissue culture 12
Thiamine 283
Thyroid gland, comparative anatomy of 121
Time's Arrow and Evolution 211
Tissue cultures 11
  survival time 16
Tolerance theory of vitamin action 267
Turbidity and amount of lactic acid produced in riboflavin-free medium . . 271
Variability by year 208
Variability in expression of differentiation in *Obelia* 195
Variability in expression of organization in *Obelia* 206
Vitamin action
  present concepts of 267
  tolerance theory of 267
Vitamin requirements of bacteria 268
Vitamin fed cells 271
Vitamins, effect on growth of *Lactobacillus casei* 141-145
Voles
  body weights of 101-104
  brain weight 104
  thyroid weight 108
  adrenal weight 109
  heart weight 109
  mean liver weights 111
  mean kidney weights 113
  lung weights 115
X-ray damage, criteria of 167
X-ray dosages 155
  as a function of time 164, 165
X-rays, effects on 155
  snails 155
  Crustacea 155
  algae 155
